Other (Specify):

Project Number: 557089 EPP1-2014-IT-SPO-SC

Description of the organisation

Rita Levi-Montalcini is a secondary institute based in Acqui Terme, Italy. The programmes offered are: Finance & Marketing, Hospitality & Tourism Management, Chemistry & Biotechnology, Electronics & Electrotechnology and Health Care Services studies. These are 5 year programmes that furnish the requisites for university and the qualifications for the job market.

The school has of 905 students of which about 20% are foreign students of diverse backgrounds, 111 teachers and 29 other staff members.

The multi-ethnic community, parents, administrators, students, and staff work together to create an academic, physical, emotional, social, and safe environment where everyone can learn and respect one another. We care about ourselves and others to create, support and maintain powerful, engaged learning in the Arts and Sciences. We use innovative techniques to enhance life long learning through technology, varied instructional strategies, and interdisciplinary units. We share our cultural backgrounds to nurture growth, responsibility, and productivity by celebrating our diversity within a positive school-wide atmosphere and by promoting sportsmanship, school spirit, and pride in ourselves through our daily studies and our educational accomplishments.

We take particular care of students who need guidance or assistance in solving personal and school related issues by offering:

- Courses to help students experiencing difficulties in any particular school subject,
- School Psychologist
- Tailored programmes for special needs students
- Italian L2 courses for students who have recently transferred to Italy
- Social-cultural activities
- Curricular and extra-curricular sport projects

Our school has a close working relationship with the local administration and those of the surrounding towns and the business community as we regularly participate in regional and provincial projects and our students do job internships with local businesses.

Experience of the organization in previous European projects

2011 (promoter RLM) Leonardo da Vinci LLP: TER.ME project learner mobility "Territory and Markets, The New Skills" The project (work experience) aims to help youths develop personal growth through the ability to make important choices, establish an educational and professional path to follow and to ease mobility.

2012 (promoter RLM) Leonardo da Vinci LLP: RE-ENERGY project "Building the sustainable economy" The project (work experience) focuses on renewable energy and energy efficiency. It aims to train students to develop skills in this field.

2014 (promoter RLM) ERASMUS+ Programme-KA1 Learning Mobility of Individuals: TER.ME "Territory and Markets, The New Skills"

2014 ERASMUS+ KA1VET: RE-ENERGY project "Building the sustainable economy"

Co-funded by the
Erasmus+ Programme
of the European Union

Experience and Expertise of the organization in the project's subject area

Extra curricular sports projects are an integral part of our yearly programming. The "ski project" which entails down hill and cross country skiing from beginner level and up offers students the opportunity to learn the sport as well as respect for rules, the environment and social interaction.

"Beach & Volley School" is an annual project organised by the Italian Volleyball Federation in which we take part for four days every year. Students learn to take responsibility for their living quarters, interactions, arriving on time for all activities throughout the day. The Federation pays particular attention to involve students with disabilities in this experience.

"Student Sport Games" is an on going project that aims to introduce different team and individual sports from those traditionally practice in the PE class. Moreover, it introduces younger students to acquire skills that can be used in more complex situations.

The above mentioned projects entail away trips to other regions of the country for the duration of one to five days. Due to the nature of the subjects studied (History, Art history, Environmental studies, Tourism) at our institute these projects are an opportunity for cross curricular teaching.

Contributions that can be provided to the project

Experience in projects involving school and surrounding territory.

Experience in interdisciplinary learning.

Working knowledge of the difficulties Italian Schools face in trying to overcome the problems highlighted in the "Not Only Fair Play" Project
